

ROSECREST

A Master-Planned Community

Plat V Phase 3

Exhibit “B”

DESIGN GUIDELINES

SINGLE FAMILY RESIDENTIAL DEVELOPMENT

1.0 INTRODUCTION

The information in the Rosecrest Design Guidelines governs the appearance and use restrictions within Plat V Phase 3 subdivision that are expressly different from the Rosecrest Technical Guidelines. The rules and regulations within this document will help to ensure that the visual quality and desirability, that form the basis for investing in the Rosecrest Development, remain stable for both current and future residents. These guidelines, in addition to the following documents:

Rosecrest Master Development Agreement (RMDA)

Rosecrest Master Plan (RMP)

Rosecrest Communities Covenants, Conditions and Restrictions (CC&R's)

Herriman Development Code (HDC)

Rosecrest Technical Guidelines (TG's)

shall guide the decisions that are made by the Rosecrest Design Review Committee (RDRC) when reviewing applications for development or construction. The Design Guidelines shall serve to modify existing municipal ordinances as allowed within the scope of both the RMDA and the CC&R's.

2.0 DESIGN GUIDELINES

2.1 Purpose and Intent •

These guidelines govern all Single Family Detached Residential development and construction within Plat V Phase 3 of the Rosecrest Development.

2.2 Use of Guidelines •

The RDRC shall utilize these guidelines when reviewing applications for Single Family construction. These guidelines shall be made available to each lot owner at the time of closing. Copies of these documents shall be available for review at the offices of Rosecrest Communities, LLC ("Rosecrest") during normal business hours. Additional copies may be purchased for a nominal fee that is determined solely by the RDRC.

2.3 Compliance with Guidelines •

See section 2.3 of the Technical Guidelines.

2.4 Modification of Guidelines •

See section 2.4 of the Technical Guidelines

2.5 Special Conditions, Variances and Exemptions •

See section 2.5 of the Technical Guidelines

2.6 Resolution of Conflicting Conditions or Codes •

When a conflict arises between various governing documents the RDRC shall issue a 'Statement of Resolution'. In general, the order of priority for ruling documents shall be as follows:

1. Rosecrest Master Development Agreement
2. Rosecrest Communities Conditions, Covenants and Restrictions
3. Rosecrest Design Guidelines
4. Rosecrest Technical Guidelines
5. Herriman Development Code

3.0 DESIGN REVIEW PROCESS

The process for reviewing single-family residential applications within Rosecrest shall be as follows:

3.1 Rosecrest Design Review Committee •

See section 3.1 of the Technical Guidelines

3.2 Review Submittals •

One set of plans detailing any improvements or changes to a lot or dwelling shall be submitted to the RDRC for approval based on the schedule described below. All plans shall be drawn to scale where appropriate, and sheet size should not exceed 24" x 36". The plan submittal shall include the following information:

- A. Rosecrest Design Review Committee Review Application
- B. Site Development Plans that include the following:
 - Lot boundary and dimensions
 - Locations of easements, rights-of-way and setbacks

- Locations of any existing improvements or landscape elements
 - Location and size of all proposed improvements
 - Front, side and rear elevations of any architectural element or improvements
- C. List of all exterior materials and colors (where appropriate)
- Samples of any unusual or custom materials
- D. Landscape plans and plant materials (where required)
- E. Any additional information as required by the RDRC

3.3 Multiple Copies of Same Floor Plan •

A Builder that proposes to build multiple copies of the same home must provide this information for each model. All variations of Elevations for the model must be approved by the RDRC. Additionally, the Builder must submit all required site plan information to the RDRC for review each time the floor plan is to be placed upon an individual lot within the development. Multiple copies of the same home can only be constructed in accordance with the applicable rules within these guidelines, which require the following:

Multiple copies of same floor plan can be constructed every third house when counted on either side of the street. There must be at least (2) houses of differing floor plans between duplicative or the same floor plan.

To modify a duplicative floor plan so that it is not considered the same, the builder or owner must consider a number of the following design changes:

- Alter the rooflines
- Change color schemes
- Siding textures altered
- Move garages
- Increase or alter windows
- Increase or alter covered porches
- ** Any changes subject to approval by RDRC

3.4 Review Schedule and Fees •

All plans submitted to the RDRC for approval will be reviewed within 30 days from the date received at the development office. A reasonable fee may be charged for the review process. Any unusual request for construction may require the review of an expert in the field or a consultant. Fees for such review will be charged to the applicant. All review fees must be paid at the time of submittal or upon notification that a consultant will be used to complete the review.

A builder that proposes to construct multiple copies of the same home may request an adjusted fee schedule for reviews by the RDRC.

Applications, plans and fees shall be submitted to:

Rosecrest Design Review Committee
4393 Riverboat Road, Suite 450
Salt Lake City, Utah 84123
(801) 316-3215
(801) 657-3096 / Fax

3.5 Changes after Final Review •

See section 3.5 of the Technical Guidelines

3.6 Decisions •

See section 3.6 of the Technical Guidelines

3.7 No Liability for Approval of Plans •

See section 3.7 of the Technical Guidelines

3.8 Accuracy of Information •

See section 3.8 of the Technical Guidelines

4.0 (Intentionally Left Blank)

5.0 SITE DEVELOPMENT STANDARDS

Proposed construction of improvements within lots and building sites for Single Family homes shall be reviewed and approved according to compliance with the following standards.

5.1 Setbacks •

Residential building setbacks within Rosecrest Plat V Phase 3 are listed in the following chart. Additional setback modifications may be required along certain collector roadways as designated by the RDRC. Easements for utilities and drainage may exist along individual lot lines. These easements may be greater than the required setbacks that are listed below. All builders and homeowners shall be required to show any easement that affects the building lot on the documents that are submitted to the RDRC for review and approval.

Primary Structures -

Lot Size	Front	Rear	Side Yard
All Lots	19'*	15'	7' min./14' total

* Front setback measurement is to be taken from “back of sidewalk” to furthest protruding point on garage. “Back of sidewalk” is defined as the sidewalk edge closest to the house.

Additional Setbacks -

Detached Garage & Accessory Building	- Min. 7’ Side and Rear Setbacks
Corner Lots	- Min. 2nd Front Setback of 14’**
Rear Decks - 2' Above Grade	- Min. 5' Side/10' Rear Setback
Patios, Decks and Walks - at Grade	- 5’ Side/5' Rear
Corner Lot Fencing and Walls	- 3’ off Back of Sidewalk

** Or as governed in Herriman Cities site distance requirement.

5.2 Building Heights •

All Detached Single Family Residential construction shall be governed by the height restrictions as described in the Herriman City Code (HCC) with the exception that detached garages or accessory buildings in the rear of the lot may not exceed 16'. No second level shall be allowed in detached garages.

5.3 Garages and Accessory Buildings •

The use of recessed and side-turned garages is strongly encouraged. Garages may be attached or detached from the primary residence. Front-loading garage doors must not protrude in front of the main building façade. Buildings with front-loading garages flush with front of main building facade must have a covered porch. Other front-loading garages will be evaluated on a case-by-case basis by the RDRC. The visual image of attached garages should be minimized in the streetscape, and garage proportion should be proportionate to the homes living space. Garage square footage must not exceed 35% of main floor living space square footage. This may be accomplished by the use of structural elements, variation within the building facade or decorative elements on the garage facade. Front porches and building entries may protrude in front of the garage as allowed by the lot setback. Detached garages must be similar in style and color to the primary residence. A detached garage must be placed within

the rear yard area of the lot and must be clearly shown on the site plan that is submitted for review.

Accessory buildings shall be of a permanent nature and must be of similar construction, materials and color as the primary residence. All Accessory Buildings must meet required setbacks as specified in this document, and must be screened from public view.

An attached or detached garage may not be accessed from the Mount Ogden Peak Drive right-of-way.

5.4 Porches, Decks and Overhangs •

Covered porches, decks and overhangs are encouraged to provide variety to the building facades of each residence while maintaining architectural integrity and unity within the structure. The appearance of 'add-on' elements should be avoided by integrating these elements into the design of the structure.

6.0 ARCHITECTURAL STANDARDS

The architectural patterns within the Rosecrest Plat V Phase 3 will have a strong theme that shall include Mountain, Craftsman & European Rustic Styles. The RDRC shall have broad discretionary powers in the review and approval of architecture.

6.1 Style and Character •

The general style and character of each residence shall be appropriate to the size of the lot, the location within the Development and topography. Homes on sloping lots that result in large retaining walls due to the poor integration of the home and topography may be denied by the RDRC. The incorporation of dormers, porches, wide roof overhangs, and similar elements into the design of the home is encouraged. These patterns are to be used as a guideline in designing homes for Rosecrest. The RDRC may approve additional building styles based on location and merit.

6.2 Building Size •

The minimum building size for the Plat V Phase 3 subdivision shall be regulated based on lot size according to the following chart. Square footage shall be based on above grade livable space. Garage square footage and finished space in accessory buildings may not be included in the total square footage.

Minimum Building Size (in Square Feet)

Lot Size-Sq.Ft.	Rambler	Two-Story
All Lots	1,600	2,000

6.3 Exterior Materials and Colors •

All exterior materials shall be suitable for the climate and exposure with a minimum of deterioration and wear. Materials shall be selected that will be maintenance free. The RDRC may reject any architectural material that it deems to be of inferior quality, or aesthetic appearance or problematic with regard to the intended use. New materials will be considered for use in the Development as they are developed by the building industry.

Architectural colors shall be harmonious with the setting and the neighboring properties. Subtle or muted tones as well as earth tones are best for the dominant areas of the structure. Pastels and bright colors shall not be used. Roof colors will be evaluated as they relate the character of the home as well as for compatibility with the neighboring structures.

6.4 Elevations •

The exterior of each home must meet or exceed the following minimum standards for finish and materials. All windows and doors should be trimmed or set apart from the plane of the facade by accent colors. The use of shutters or similar exterior trim elements is encouraged.

Front Building Elevation - Brick, rock, stone or other masonry elements must be used for the finish system on the front building façade and must make up a minimum of 30% of the total area of the front facade. Brick or stone shall be used on the front elevation to show significant masonry architectural detail in the form of vertical accents. However, Fiber cement products (such as Hardy Board or other similar products) and other architectural details may be used in lieu of brick/stone if approved by the RDRC. Manufactured materials may be substituted for real stone products. The remainder of the front elevation may be finished with a combination of stucco, fiber cement material, or brick products. The use of vinyl and aluminum siding is prohibited. **All finish materials used and their placement on the facade must be indicated on the elevation rendering when submitted for review to the RDRC.**

Side Building Elevation –Each side elevation must include at least two windows per floor, unless the home contains a wainscot that covers the entire length of the side elevation. In which case, only one window per floor is required. The windows should make-up 5% of the side façade for a standard lot. For corner lots the windows should make up 10% and must have similar window treatments as the front façade windows, i.e. trim and/or shutters.

6.5 Roofs •

Roof planes for lots on a street without a cul-de-sac shall have a minimum pitch of 6:12 (vertical to horizontal). Lesser pitches may be utilized on small areas of the roof plane such as shed dormers and patio or porch roofs. The design of the roof should appear as an integrated architectural element. 30 year architectural grade roofing is the minimum required roofs in the Rosecrest Development. Other shingle materials that meet or exceed the minimum requirement may be approved by the RDRC.

A minimum fascia height of 4" shall be required for all homes. These elements shall be finished to match the finish and color of the home. Exposed rafters and open soffits shall only be allowed by the RDRC when they relate to the style of the architecture. In such cases, the soffit and rafters must be painted to match the building. Soffit and fascia finish materials must be approved by the RDRC. All homes are required to have a full gutter system.

6.6 Porches and Decks •

The use of covered porches and decks to extend the living area outdoors is strongly encouraged. Front porches may extend into the front setback area as allowed in Section 4.1 - 'Setbacks'. The installation of railings on porches where appropriate is encouraged.

Rear decks shall be integrated into the design of the structure. The appearance of a deck supported by 'spindly legs' should be avoided with minimum size support posts of 6"x 6". The RDRC may require the use of structural elements beyond that required by building code to achieve visual balance between the deck and the support structure.

6.7 Fencing and Walls •

Fencing and walls around residential lots is permitted. All fences, walls, and screening must comply with the following standards. All fencing within Plat V Phase 3 must be constructed of a tan vinyl product. In an effort to maintain and preserve continuity, aesthetics, and property values, no other fencing colors will be allowed by the RDRC. No chain link fencing shall be permitted with the exception of sport court fencing and small dog runs within the individual rear lots. Any chain link fencing must be vinyl coated and screened from public view. All fences on sloping lots must comply with these standards while stepping with the grade with the exception that open, three rail fences may follow the contour of the lot. The top rail of stepped fences must be constructed in a level plane. On stepped fences the height shall be measured at a point that is midway between the posts. Fences must step in four or eight-foot lengths as determined between posts. Fencing along corner lots must be setback a minimum of 3 feet from the back of sidewalk.

The following fence standards shall govern for areas along Development open spaces and parks, collector roadways, and commercial areas.

Parks and Open Spaces – Tan vinyl 6’ privacy fence along all areas adjacent to open space or three rails tan vinyl fence with 100% finished rear or side yard landscaping is required.

Front Yard – Tan vinyl fence product, 3' in height in the front yard setback area of the lot. Accent posts or columns may be used that exceed 3' provided they do not exceed 10 percent of the lot frontage. The maximum height of any front yard structure may not exceed 8'. Front yard fencing, walls and screening shall be constructed of tan vinyl products. Care must be taken at driveway entrances and at corner lots to not intrude on visual clear zones for traffic safety intersections. Fencing along the front property line must be setback a minimum of 3 feet from the back of sidewalk.

Rear and Side Yard - Tan vinyl fence product, 3’ - 6' in height in the rear or side yard setback area of the lot. For rear and side yards along open space areas, the standards under those sections shall govern. Accent posts or columns may be used that exceed 6' provided they do not exceed 10 percent of the rear lot boundary distance. The maximum height of any rear yard, non-habitable or landscape structure (gazebos, playground equipment, etc.) may not exceed 12'.

Side yard fencing on corner lots shall be treated as a front yard fence and must not intrude on visual clear zones for traffic safety at intersections.

6.8 Garages •

Each home is required to have a two-car garage. The garage may be attached or detached from the main structure. All garages must match or complement the design of the home. The finish materials of the garage must match the finish of the home. **All garage doors must be Carriage style**; any exceptions need written approval from the R.D.R.C. Front loading garages must not protrude from the front façade of the home.

6.9 Contemporary and Technological Conveniences •

New products and technological conveniences such as satellite dishes may be evaluated and regulated as to location and use by the RDRC. Satellite dishes larger than 24 inches in diameter and radio and TV antenna taller than 8 feet shall not be permitted except by special permission from the RDRC. Location, visibility from adjacent properties, color and screening will be considered in granting permission for such devices. Approval of such devices shall be considered a 'Conditional Use'. As such, the permit may be withdrawn by the RDRC upon violation of any conditions that were imposed at the time of the approval. In such cases, the device must be removed within 30 days of cancellation of the permit.

7.0 LANDSCAPE STANDARDS

The following landscape standards shall apply to all Single Family lots or development. The Owner or Applicant for RDRC approval shall be required to implement these standards.

7.1 Landscape Planting •

Each lot or residential parcel shall meet or exceed the following landscape standards:

Front Yard Landscaping - The front yard area of each lot or parcel must be landscaped by the builder prior to occupancy. When closings occur during fall or winter months (defined as November 1 to February 28), the builder shall be required to install front yard landscaping by the following April 30th. It is the builder's responsibility to ensure that front yard landscaping is installed within the timeframes listed above.

The minimum requirements for front yard landscaping (based on square footage of front yard area) are as follows:

- A. Minimum 2 Street Trees (2" caliper min.) or 1 Street Tree per 25' of frontage (i.e. 75' frontage requires 3 trees). Corner lots fronting public right of ways shall have the same tree requirements as front yards. i.e. 1 street tree every 25' of frontage. Builder/Homeowner can choose between Chanticleer Pear or Cimmarron Ash for parkstrip trees.
- B. Minimum 1 Yard Tree (2" caliper min.)
- C. 3 shrubs (5 gallon) per 600 s.f. (Hedges and Arbors are encouraged.)
- D. 1 evergreen shrub (5 gallon) per 600 s.f.
- E. Sod grass.

The balance of the front yard shall be landscaped with sod, ground cover or planting beds. Water conservation irrigation methods are encouraged. Xeriscaping is not to exceed 30% of the total front yard landscaping and must include sod or grass element. Visual clearance for driveways and streets must be maintained.

Rear Yard Landscaping - The rear yard area of each lot or parcel must be landscaped by the homeowner within 60 days of issuance of the 'Certificate of Occupancy'. The minimum requirements for rear yard landscaping are as follows:

- A. Sod or hydro seeded grass.

The balance of the rear yard shall be landscaped with sod, ground cover, planting beds, or a vegetable garden. Rear yards on corner lots shall be held to the same standards and timelines for landscaping completion as front yard areas, unless the side and rear yards are fenced, then the rear yard landscaping standards apply.

Side Yard Landscaping - The side yard area of each lot or parcel must be landscaped by the builder prior to occupancy. When closings occur during fall or winter months (defined as November 1 to February 28), the builder shall be required to install side yard landscaping by the following April 30th.

The minimum requirements for side yard landscaping shall be the installation of sod or hydro seed, ground cover or planting beds. Gravel is not an acceptable landscape material on side yards. On corner lots, the side yard facing the street shall be treated as a front yard and landscaped accordingly.

All lots are required to install automatic irrigation systems. Homeowners are encouraged to install irrigation systems prior to the installation of any landscaping. Irrigation systems must provide coverage within the front or side Yard Park strips. The use of water conserving drip irrigation system is encouraged.

7.2 Erosion Control Planting or Measures •

All graded areas of any lot may be required to install temporary erosion control plantings or similar erosion control measures in advance of the final landscape installation and during building construction. All final landscape plans must address erosion control issues for the home, the lot and any drainage easements that may exist along the lot boundaries. Homeowners may not alter or remove any existing erosion control or drainage system improvements without prior approval from the RDRC. Erosion control plans shall be submitted to the RDRC for review and approval.

7.3 Easements and Rights-of-Way •

The planting of the front easement and side yard park strip is required to be completed by the homeowner / builder before issuance of the 'Certificate of Occupancy' for each residence. Planting shall consist of sod and flowerbeds as desired by the homeowner. Trees shall be placed within the yard and must be selected from the approved street tree list and coordinated with the 'Street Tree Master Plan'. The lot owner is responsible to maintain the front easement area in a healthy and weed free condition. Any lot that shares a boundary with an access easement (except for public trail or landscape easements) to a common area or facility must also landscape and maintain the easement. Public trail and landscape easements will be planted and maintained by the Homeowner's Association or an appropriate governmental authority.

7.4 Preservation of Existing Trees and Re-vegetation •

Significant areas of native trees or exceptional specimens of native trees may exist within the Rosecrest Development. These trees should be identified on the RDRC submittal plans. Care should be taken to preserve as many of these

native trees as possible within the building lots. Wherever possible, development plans shall strive to locate native trees in common areas.

7.5 Plantings Adjacent to Development Open Space •

Private residential plantings along Development open spaces should be planned to provide for screening and privacy where desired by the homeowner. A hard, mowable edge or a planting bed with a spun fabric weed barrier is recommended along the boundary. As maintenance within the common areas may vary and planting may be limited to native vegetation this will help to minimize weed intrusion into the residential landscape. Placement of private landscaping within the common area is not permitted. Any such plantings may be removed by future development without notice or compensation to the homeowner. Maintenance to control weeds and fire hazards within the common areas by the owner of an adjacent property may be permitted.

7.6 Maintenance •

See section 7.6 of the Technical Guidelines.

7.7 Weed Control •

See section 7.7 of the Technical Guidelines.

8.0 LIGHTING AND MISCELLANEOUS SITE FEATURES

See section 8.0 of the Technical Guidelines.

9.0 SIGNAGE

See section 9.0 of the Technical Guidelines.

10.0 GENERAL CONDITIONS AND MAINTENANCE

See section 10.0 of the Technical Guidelines.
